

Flossbach von Storch - Global Convertible Bond - RT

Flossbach von Storch investment sub-fund under Luxembourg law (mutual fund) and authorised for distribution in Portugal.

INVESTMENT STRATEGY

The objective of the investment policy of the Flossbach von Storch - Global Convertible Bond sub-fund is to achieve reasonable growth while taking account of investment risk. The sub-fund invests predominantly in international convertible bonds and comparable securities. In addition to interest income from bonds, the result should be mainly determined by the profit potential from conversion rights into shares. An investment may involve a mixture of shares, bonds, investment funds and certificates, with the exception of certificates on hedge funds and certificates on hedge fund indices. However, no more than 10% of the sub-fund's assets may be invested in other investment funds. The subfund can utilise financial instruments whose value is dependent on the future prices of other assets ("derivatives") for hedging purposes or to increase its assets. The sub-fund is actively managed. The fund manager determines, regularly reviews and, if necessary, adjusts the composition of the portfolio exclusively in accordance with the criteria specified in the investment policy. The performance of the sub-fund is compared against the index as reference. The fund manager is not bound at any time to the index in his investment decision and portfolio composition. Therefore, the performance of the sub-fund may differ significantly from the indicated reference index. For detailed information on the objectives and investment policy, please refer to the most recent sales prospectus and the Key Investor Information Document (KIID).

PERFORMANCE IN EUR SINCE 17 OCTOBER 2016 (In %)

Return on investment may only be obtained if the investment was made for the entire reference period.

ACCUMULATED PERFORMANCE IN EUR (IN %)

	2017	2018	2019	YTD 2020
Funds	+3.85 %	-7.07 %	+10.08 %	+0.32 %

EXPLANATORY NOTES REGARDING PERFORMANCE

Past performance is not a reliable indicator of future performance. Performance is calculated based on the net asset value (NAV). The subscription fee, as well as other fees, are not taken into account and therefore have a negative effect on the performance of the investment. Example calculation (subscription fee included): An investor wishes to buy shares with capital of €1,000. Based on a maximum subscription fee of 5%, €50 will be deducted from their investment as a one off initial charge. In addition, custody fees may be applied. **Please refer to the cost details presented in this document to determine the maximum subscription fee for the share class of the sub-fund.**

The reference index is merely informative. It does not constitute any obligation to track the index or achieve the same performance for the fund manager.

MONTHLY COMMENTARY

January had several surprises in store for bond investors. Although the Iran crisis and the outbreak of the coronavirus in China hardly had any negative effect on the stock markets, or only affected them towards the end of the month, "safe-haven" investments were surprisingly in demand in the bond market. Government bond yields fell significantly, for example, after recording large gains in previous months. Convertible bond markets reflected the mixed performance recorded by regional stock markets. While the Euro Stoxx 50 was down 2.8 per cent, the S&P 500 rose 1.2 per cent and the Nasdaq index even gained 3.3 per cent. The picture was similar for convertible bonds. While European convertible bonds rose less than one per cent, US convertible bonds gained almost three per cent. The Thomson Reuters Global Focus index, driven by US convertible bonds, gained 1.6 per cent. The share price of the Fund, which is currently mainly invested in euro-denominated securities and relatively cautiously positioned, was unable to fully match this performance. We fully sold our holdings of Western Digital, for example, during the reporting period, while adding new positions in companies like Zynga and participating in new issues by Life Nation and Sino Biopharmaceutical.

- » Bachelor and Master of Finance from the European Business School, Oestrich-Winkel, with study periods at AIT Bangkok and EAE in Barcelona (2005 – 2010)

Flossbach von Storch - Global Convertible Bond - RT

OPPORTUNITIES

- + Investing in funds can deliver an attractive result at a lower level of risk compared to a direct investment in equities.
- + Income can be generated from regular interest payments.
- + Convertible bonds can increase in value when equity markets rise.
- + Derivatives can be used to increase potential yields.
- + Investing in assets denominated in a foreign currency can have a positive impact on unit values as a result of exchange rate movements.

RISKS

- Investing in convertible bonds may entail price risks, especially in the case of rising interest rates on the capital markets.
- Convertible bonds can decline in value when equity markets fall.
- Country, credit and issuer liquidity risk. Also potential exchange rate risks. If securities are illiquid (i.e. thinly traded), there is a risk that it may either not be possible to sell the assets at all or only by accepting a significant discount on the sale price.
- Where used, derivatives can have a greater negative impact on the fund value than would be the case if the assets were acquired directly. This can affect the fund's risk profile and volatility (tendency for the price to fluctuate).
- The straight concentration on special markets can have a negative impact because of the dependent performance of these selected markets.
- Investing in assets denominated in a foreign currency can have a negative impact on unit values as a result of exchange rate movements.

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

The Risk and Return profil of this sub-fund is included on page 3 of this factsheet.

INVESTOR PROFILE

CONSERVATIVE:

The fund is appropriate for conservative investors. Due to the composition of the net sub-fund assets, there is a moderate degree of risk but also a moderate degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZONT:

Medium-term: 3 to 5 years

RISK/RETURN PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The historical data used for calculating the synthetic indicator is not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment. This share class has been placed in the aforementioned risk class because its unit price is subject to medium fluctuation, therefore the profit potential and loss exposure may be moderate. Because of the calculation model used, all risks may not be taken into consideration when placing the share class in a risk class. Detailed information can be found in the section entitled "Risks" of the prospectus.
